Living the principles

“

*I don't do this job because I want to earn a big income. Although I have Bachelor's and Master's degrees, I do this work because I love the individuals.*

*I retired after 33 years teaching special education. But I returned to this line of work because it fulfills me emotionally, to be back working with individuals with special needs again. My heart has been tied to this field for all of my life.*

”
