

“

I interviewed with UCP in 2015 after my employer of nearly 12 years downsized. I was offered and accepted a position with UCP because I believe in the organization's mission and principles. I also appreciate the diversity and culture of UCP which is more like a family than other places I have worked. It turns out that by taking this position, my life has come full circle, as I received Early Intervention physical therapy services from UCP as a child.
