

I stay at UCP because.... From the time I was in high school, I know my path was to work with children as a physical therapist. After marrying, we moved around every couple of years, so it was challenging to put down roots - both in the community and at work. But, after settling in Central PA, UCP opened its doors and welcomed me - and over 20 years later here I am! Why do I stay? UCP always supports me as I support the families that I work with - to empower parents to help their children meet motor milestones, and to find joy in the journey ahead. I have found great joy in MY journey with UCP!

My advice for new staff.... Don't be afraid to ask questions, to challenge, to make yourself vulnerable. UCP employees come from such diverse backgrounds - there is so much to learn about life and about yourself - Take advantage of UCP's strengths to empower yourself so that you will learn and grow in your unique UCP journey.
